

“The World’s Greatest Romance” TECHNICAL/EQUIPMENT NEEDS

STAGE

- Preferably a 24’ wide by 16’ deep area clear of any columns or obstacles.
- Raised 8” to 16” platforms or stage.

SOUND

- Carol will arrive with her own mic/receiver/cable to patch into the existing sound system.
- Please provide sound technician for scheduled rehearsal, sound check and performance. Must be the same person at all above. Using the house system with ceiling speakers is not acceptable.

LIGHTING

- Be aware if positioning a stage (especially in a hotel ballroom) that there is adequate light above the stage area. If possible, rent lighting to create a full wash across the stage area. A combination of pink, blue and yellow gels is most effective.
- Lighting is flexible according to location. Every attempt possible should be made to provide focused lighting on the stage area.

POWERPOINT

- This element of the production is optional. If existing screens and powerpoint capabilities exist, it will be used.
- IF USED Please provide technician and computer to run powerpoint from marked script. This person must be at scheduled rehearsal.

PIANIST /PIANO

- Carol will provide a CD accompaniment track and marked script for the performance. The sound technician will be running these sound cues.

EQUIPMENT/PROPS

- Please provide an old-fashioned looking rocking chair: as plain as possible. Lightweight enough to be picked up from behind by the arms and carried.
- Please provide 2 music stands OR coat racks to hold costumes.
- Please provide 6 boxes or wooden crates of varying sizes. This will be covered with a large dark cloth. This is to replace the steamer trunk that Carol usually provides if possible. The purpose is to create different levels for props to be placed for the play. The design should be about waist high and 3-4 feet wide. If a steamer trunk is available that is optimum, but not expected.

SCHEDULE

- Carol needs at least 30 minutes to set up the set and props before rehearsal.
- A rehearsal of at least 1 hour must be scheduled before the house opens. The following people should be present: sound technician, powerpoint operator (if applicable), lighting technician (if applicable).
- A sound check immediately before the house opens should be scheduled.

CD SALES

- Please provide a small table and a volunteer to sell Carol’s CDs after the program. Carol will provide cash bag with change.

DRESSING AREA

- Please provide a private area with a mirror for Carol to dress with bathroom close by.
- A bottle of water would be appreciated.
